KNÜRR® EVENTCONTROL

245 to 247

Knürr® EventControl

A clearer overview at the crucial moment

Knürr® EventControl enhances the control room with intelligent event management: external signals and defined events are translated into coordinated responses within the working environment. This helps to speed up processes, reduce response times and further improve operational safety in the control room.

Whether it is a signal contact, motion detector, barrier, camera or other external trigger, Knürr® EventControl links incoming events to targeted actions within the KVM environment and in the control room itself. Relevant content can be automatically displayed on workstations, monitors or video walls, and supporting room functions can be activated as required by the situation.

In modern control rooms, every second counts. Information must be available in the right place at the right time. Knürr® EventControl provides exactly that support: events are not only detected, but also channelled into predefined, traceable response procedures.

Better overview. Faster response. Greater safety.

- Faster orientation in critical situations.
- Fewer manual interventions in the event of an incident.
- Consistent procedures for alarm, safety or process events.
- Better support for operators during ongoing operations.

Function:

- Integration of external signals into the workstation and control room environment.
- Processing of various events from technical or infrastructural sources.
- Freely definable event and control logic.
- Automated triggering of system functions.
- Targeted switching of KVM sources.
- Automatic display of relevant content on monitors and video walls.
- Integration of lighting and room scenarios.
- Output of control and status signals to connected systems.
- Flexible adaptation to individual operational and security requirements.

Your benefits:

- **Faster response times:** Events automatically trigger the appropriate actions. This reduces response times and supports operators, particularly in time-critical situations.
- **Reduced workload for operating staff:** Recurring or safety-critical response procedures can be standardised. This reduces the manual workload, allowing staff to focus their attention on the actual assessment of the situation.
- **Improved situational awareness:** In the event of an incident, relevant sources and content are displayed exactly where they are needed: at the workstation, on individual monitors or on the video wall.
- **Greater process reliability:** Predefined logic ensures traceable and consistent workflows. This minimises operator errors and enhances operational safety.
- **Holistic integration in the control room:** In addition to displaying information, supporting functions within the room can also be controlled to adapt working environments to suit the situation.
- **High flexibility:** Knürr® EventControl can be tailored to different use cases, alarm strategies and operational processes, ranging from simple signal responses to more complex escalation scenarios.

System benefits in the control room

Knürr® EventControl turns isolated incidents into concrete, coordinated responses. Instead of collating information manually, relevant content and functions are automatically integrated into day-to-day operations.

For the control room, this means:

- greater confidence in taking action during critical incidents.
- faster access to relevant information.
- standardised response procedures for improved operational quality.
- better support for operators in both routine and exceptional situations.
- an integrated interplay of technology, information and the room's function.

Typical application scenarios:

- Automatic display of defined camera images in response to external events.
- Situation-dependent switching between sources at the operator's workstation.
- Targeted display of relevant content on central visualisation screens.
- Activation of lighting or signalling functions in the event of alarms.
- Support for standardised response chains in security and control centre environments.

With Knürr® EventControl, the control room is transformed from a reactive workplace into a proactive, supportive working environment. External events automatically trigger predefined sequences, immediately bringing relevant information to the forefront and helping operators to act quickly and safely in any situation.

SERVICE & MAINTENANCE

ESSENTIAL

SCOPE OF SERVICES:

- **24/7 service hotline** – available at all times for rapid support from our experts
- **Reliable fault rectification** – service call-out within a maximum of 10 working days
- **Replacement parts included** – no additional material costs in the event of a fault

Knürr® Service – ESSENTIAL

Description	Order-nr.
ESSENTIAL Service 24 months (2Y)	94.000.024.0
ESSENTIAL Service 36 months (3Y)	94.000.036.0
ESSENTIAL Service 48 months (4Y)	94.000.048.0
ESSENTIAL Service 60 months (5Y)	94.000.060.0

Knürr® proactive on-site maintenance

Description	Order-nr.
Maintenance	94.001.000.0
Maintenance with DGUV/V3	94.001.000.0000001
Maintenance with Thermoscan	94.001.000.0000002

PREMIUM

SCOPE OF SERVICES:

- **24/7 service hotline** – available at all times for rapid support from our experts
- **Reliable fault rectification** – service call-out within a maximum of 5 working days
- **Replacement parts included** – no additional material costs in the event of a fault
- **On-site repairs included** – travel costs and labour costs are already included in the service package

Knürr® Service – PREMIUM

Description	Order-nr.
PREMIUM Service 24 months (2Y)	94.000.024.1
PREMIUM Service 36 months (3Y)	94.000.036.1
PREMIUM Service 48 months (4Y)	94.000.048.1
PREMIUM Service 60 months (5Y)	94.000.060.1
PREMIUM Service 72 months (6Y)	94.000.072.1
PREMIUM Service 84 months (7Y)	94.000.084.1
PREMIUM Service 96 months (8Y)	94.000.096.1
PREMIUM Service 108 months (9Y)	94.000.108.1
PREMIUM Service 120 months (10Y)	94.000.120.1

*In accordance with Knürr service terms and conditions

Ergonomically designed products and solutions from a single source

Knürr GmbH is one of the world's leading specialists for innovative solutions in safety- and performance-critical control centres and command rooms. For more than 50 years, the company, headquartered in Germany, has been delivering tailor-made and fully integrated workspace systems designed for demanding 24/7 operations.
